furnipart

THE STAR ON YOUR FURNITURE

furnipart was founded in 1977 and has been synonymous with high quality and innovative design ever since. We work extensively from our headquarters in Denmark to ensure all our handles and knobs are to the highest of standards. The designs, dimensions and finishes are thoroughly checked and re-checked to ensure every one of our handles looks and performs to its absolute best.

Over the years, our range has grown considerably in size, and this directory gives you a complete overview of our entire catalogue with information about the designers, materials, dimensions and finish.

the complete range/

BY FURNIPART

Deciding on what handle is right for you can be a very daunting task, as we introduce two collections every year with designs ranging from the classic through to innovative and modern.

The complete range/ by furnipart gives you an overview of all our handle designs. From knobs to profiles, they are all here.

Whether you are looking for a handle, profile or knob you can view all our product dimensions, materials and finishes to help you make the right choice.

CRADLE TO CRADLE

All our chrome and anodised aluminium profiles have been certified to bronze level under the Cradle to Cradle Certified® Product Standard since 2018. The assessment procedure is carried out by the Danish assessor Vugge til Vugge ApS. As a part of the assessment, inspectors visit our production facilities to evaluate and document the sustainability of our products. The Cradle to Cradle Certified® Product Standard is based on stringent screening requirements, and every step in our process to manufacture aluminium profiles has been thoroughly examined and documented.

Furthermore, as of March 2022, all Zamac products from our catalogue in finish 66, 99 and 9005 produced at our main production sites will also be certified according to the Cradle to Cradle Certified® Product Standard.

The Cradle to Cradle Certified® Product Standard adopts a different perspective on design and production. Instead of following the traditional view that products should be sustainable from cradle to grave, the new approach rates products according to the extent to which they can be safely assimilated into new life cycles when they no longer fulfil their original purpose. This is why we are particularly pleased to have been awarded this certification. In the long term, we are committed to making a contribution that is actively positive – rather than simply “less negative”.

DECORATIVE ALUMINUM PROFILES FOR CABINETS
 Furnipart AS
 Version 3.1
 Renewal 11 Oct 2022

BRONZE BASIC **BRONZE** SILVER GOLD PLATINUM

	MATERIAL HEALTH	✓
	MATERIAL REUTILIZATION	✓
	RENEWABLE ENERGY	✓
	WATER STEWARDSHIP	✓
	SOCIAL FAIRNESS	✓

The following parameters have been assessed and given a score (from Bronze to Platinum):

Material Health

- All chemicals have been assessed according to how they influence both humans and the environment. The aim is to make the products as safe as possible for both
 - Bronze

Material Reutilization

- Our products' ability to re-enter new product life cycles have been assessed. The aim is to eliminate waste and have products entering perpetual cycles instead
 - Gold

Renewable Energy & Carbon Management

- Vugge til Vugge ApS have looked at the extent to which we use renewable energy at our productions to either reduce or ideally eliminate the impact of climate changing greenhouse gases
 - Gold

Water Stewardship

- The quality of effluent has been assessed through a facility-wide water audit. The aim is to have effluent with drinking water quality
 - Silver

Social Fairness

- Our ability to live up to known standards for social responsibility has been assessed. The aim is to ensure good working conditions at our productions and all parts of the supply chain
 - Gold

SUSTAINABILITY

It was in 2018 that furnipart took its journey towards more sustainable production to a whole new level. Thus far, this journey has resulted in a to Cradle to Cradle Certified® Product Standard for our existing range, and it has lead onto new and exciting prospects using an innovative material. We are well aware that our knobs and handles alone cannot save the world, but we are taking small steps in the right direction and proving to ourselves and to the industry in general that there are different ways of doing things. The results that we achieve as our journey progresses lay the foundations for other sustainable initiatives that can help us and the industry as a whole to understand how to generate as little environmental impact as possible. Through our business procedures, we are committed to demonstrating that sustainability can easily become a natural part of a visionary enterprise. Not because it boosts turnover, but because it is quite simply the right thing to do.

OCEANIX/ Plato & Square

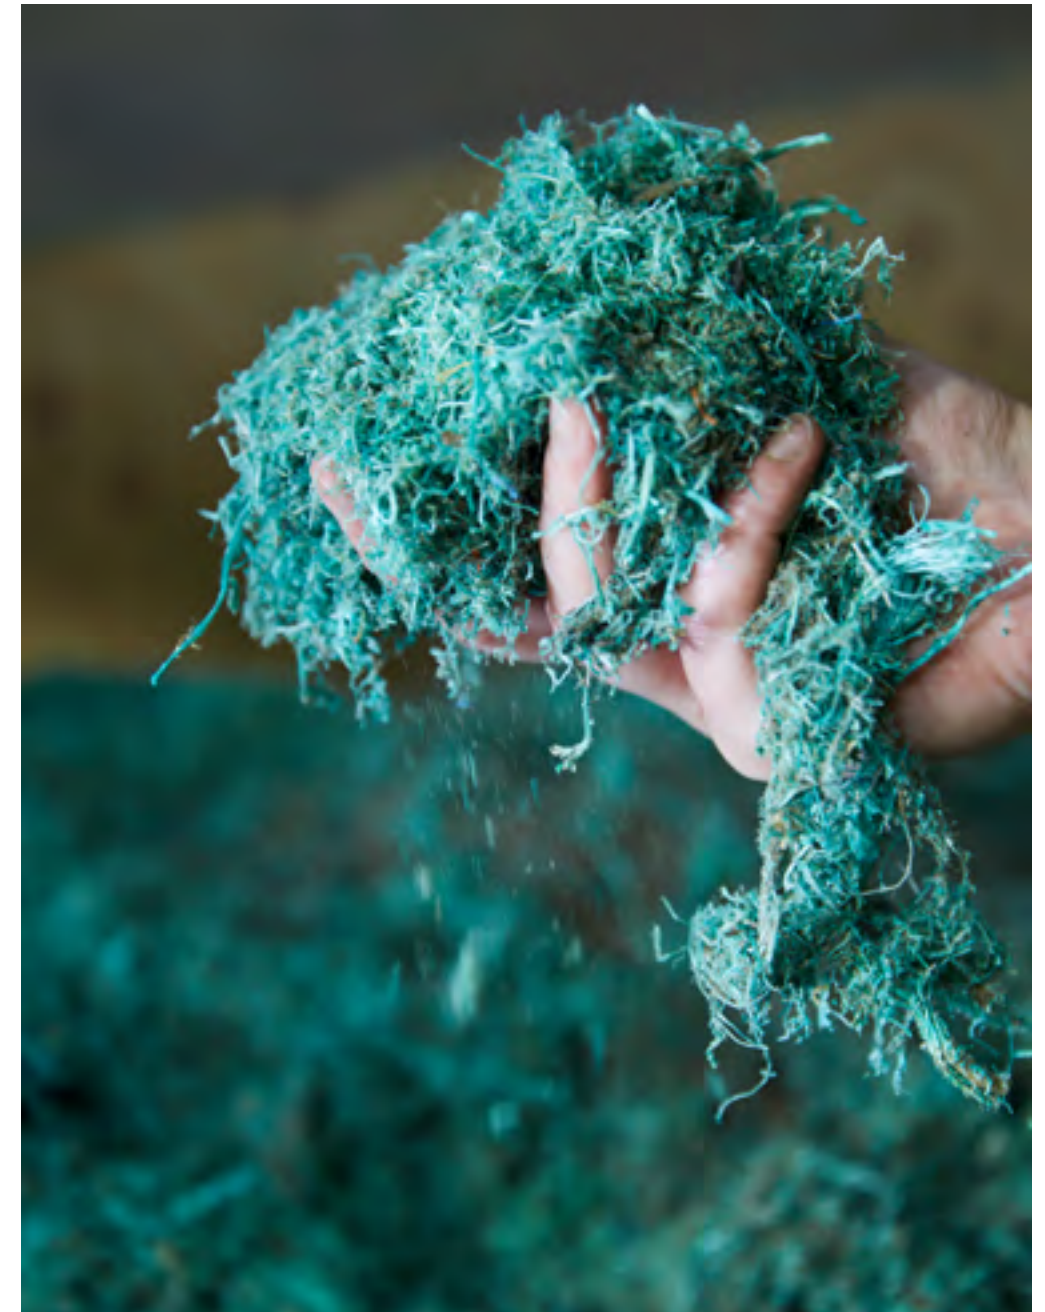

The two attractive handles – Plato and Square – made of recycled plastic can trace their roots back to a location other than furnipart, so come with us on a trip to West Jutland, Denmark. Based in the Danish town of Lemvig, PLASTIX is a small company that has developed trail-blazing technology which makes it possible to re-use plastic from abandoned fishing nets, for example, and from other plastic material used in the maritime industry. The oceans of the world are experiencing a growing problem in the form of nets, trawls and other plastic material that is simply dumped in the water.

OUR DESIGNERS

furnipart has a long tradition of collaborating with both well-established and new designers from all around the world. We take great pride in finding unique designs that fit perfectly into our collection, so when we find a new design partner, we always make a careful assessment to ensure they fit into furnipart's ethos and culture.

Adam Laws

Adam Laws is a native Australian designer whose studio is located in Sydney. His creative form concepts and innovative technical design solutions have been awarded over 20 design awards. His back catalogue of work includes brands such as Harley Davidson (USA), Youmans Capsule (New Zealand) and ChessPlus (Australia). Adam Laws is regularly enthused by Australia's beautiful and wild nature, and several of the designs he has created for furnipart have been inspired by the sea. Adam Laws is responsible for designing EDGE STRAIGHT, which has been a staple of our collection since 2012. The continual popularity of EDGE STRAIGHT has only increased over time and new colours are lengths are still being added today.

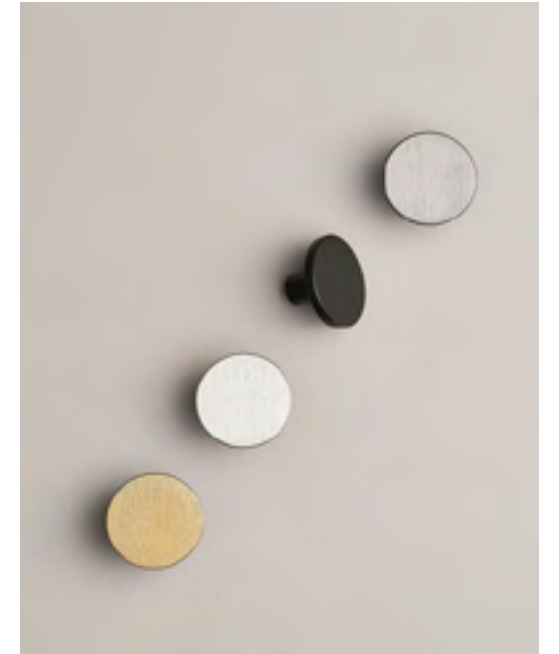

Hans Sandgren Jakobsen

You will find Hans Sandgren Jakobsen's studio located in a beautiful old harbour front building, practically on the quay edge in the Port of Grenaa. The American shaker movement's approach to furniture design, where beauty depends on functionality is a consistent influence throughout his work, such as in furniture for the

Danish Naver Collection, Japanese Kohseki CO. Ltd. and Sono AmbraTM's wooden loudspeakers. Hans

Sandgren Jakobsen's designs are above all functional. In collaboration with furnipart, he has created various handles and knobs, all with a clear reference to the Scandinavian design tradition and a light and simple design philosophy. It is clear from his designs and solutions that Hans Sandgren Jakobsen follows the mantra that less

is more.

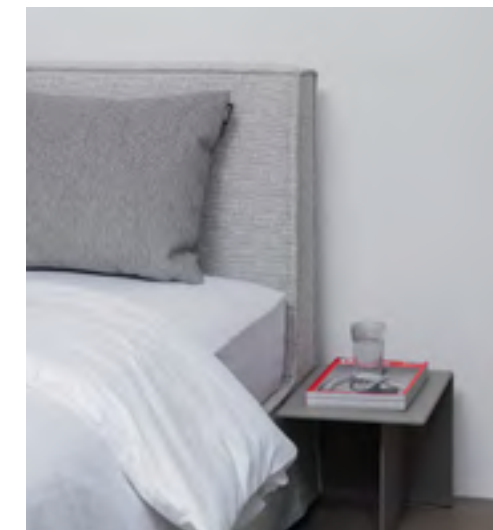

Kamper Form

Jakob Kamper is the man behind the design studio Kamper Form. He graduated as an industrial designer at Denmark's Design School (now part of The Royal Danish Academy of Fine Arts Schools of Architecture, Design and Conservation) in 2001 and his design studio is located in Ry. Kamper Form's designs are based on the idea that form should be a living thing, they should make an impression and suit the interiors of not just today but also tomorrow. Since Jakob Kamper often works with wood, his designs have proved very popular, especially at Skagerak. The collaboration with furnipart has resulted in many handles and knobs in the regular collection. For example, a handle like STATION is a beautiful example of Kamper Form's timeless look. The handle's clean lines function equally well in traditional and modern interiors, and the handle itself completely changes in character when its colour is changed.

kaschkasch

The German design studio kaschkasch was founded in 2011 by Florian Kallus and Sebastian Schneider. Located in Cologne, the studio works in furniture, lighting design and art direction. kaschkasch has a large back catalogue of designs for major international brands. At first glance their work appears formal but on closer inspection the design reveals a provocative and intelligent mode of expression, which seeks to question prevailing norms and offers new answers to existing everyday demands. Since 2019, kaschkasch has been designing handles and knobs for furnipart. Thus far the collection includes 18 of their designs in materials such as wood, aluminium and cast iron.

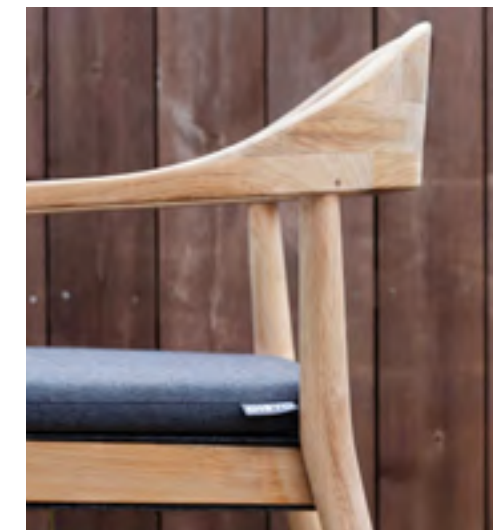

Meike Neuhaus

A small house on the edge of the forest forms the inspiring setting for designer Meike Neuhaus' aesthetic creations. Meike Neuhaus, the founder of neuhaus industrial design (2003), works best with all her versatile designs in a calm and peaceful environment. This natural environment inspires Meike Neuhaus to create such things as scenography for TV, stands for trade fairs and events, interior design, product design such as exclusive furniture handles and machine houses for components in plant construction. The challenging versatility is what Meike Neuhaus appreciates in her work above all else. The goal of Meike Neuhaus, who is a trained cabinetmaker with a degree in Industrial Design, is to create something unique. Meike Neuhaus' talent, specialist knowledge and execution are all interdependent; every design piece is as unmistakable and characterful as the respective customer.

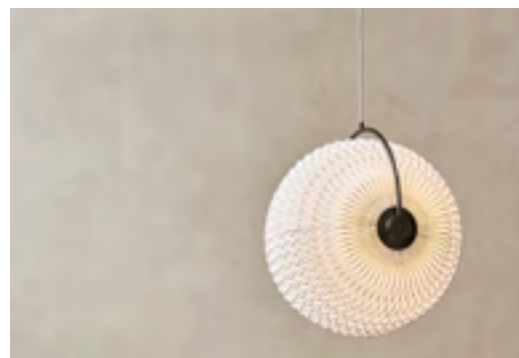

Meneghello Paoletti

The design studio, Meneghello Paoletti Associati, is located in Milan and consists of two designers – Sandro Meneghello and Marco Paoletti. Their collaboration with furnipart started in 2016, and despite this relatively young partnership, Meneghello Paoletti Associati has already made a considerable impact within our collections and they have designed handles that we already consider to be 'classics'. Meneghello Paoletti Associati has collaborated with many brands, including Artceram, Nobili and Ceramica Bardelli.

Rikke Frost

Rikke Frost first became well-known when she participated in the TV series “Danmarks næste klassiker” (Denmark’s next classic designs), which was broadcast on DR1 during the spring of 2019. Rikke Frost was named the overall winner with her furniture designed for children, which was created in collaboration with Kjeldtoft Furniture and Flexa. The BUKKI design is very indicative of Rikke Frost’s work. She loves to combine materials and make her designs tactile, as well as give them a functional and visual dimension. Her designs often have surprising details, as in the handle EDGE Filigree (launched in furnipart’s collection in 2017), which won a German Design Award in 2018.

Steffensen & Würtz

Designers Thomas Steffensen and Pia Würtz Mogensen are the founders of design studio Steffensen & Würtz. They work with industrial design in their studio in Aalborg. Thomas Steffensen and Pia Würtz Mogensen both have an MA in Industrial Design. They have collaborated with several Danish and foreign brands, including Bolia and German kitchen manufacturer Allmilmö. They got off to a flying start and began collaborating with furnipart in 2020 and contributed towards furnipart’s successful 020 Collection. The ‘handle’ HABIT is hugely popular with the innovative way it has solved an irritating real issue from everyday life.

VE2

VE2 is Morten Lauritzen and Hugo Dines Schmidt. Founded in 2007, the design studio is located in Aarhus. Both designers are graduates of Aarhus School of Architecture and they focus on durable designs which are based on quality, honesty and the designs' ability to create aesthetic and functional value for the user. Since its foundation, the studio has earned huge respect at home and abroad for brands such as Zone Denmark and Skagerak.

QUALITY

A furnipart handle is characterised by its outstanding quality; quality that not only can be seen but felt. Nothing is left to chance when it comes to our handles.

Back in 2009, we decided to formulate our own furnipart quality standard based on the standards from the German kitchen industry. As a result, tests of geometry, mechanical strength and surface are now part of both our development and serial production. Our wear-and-tear-test is performed by the German test Institute LGA.

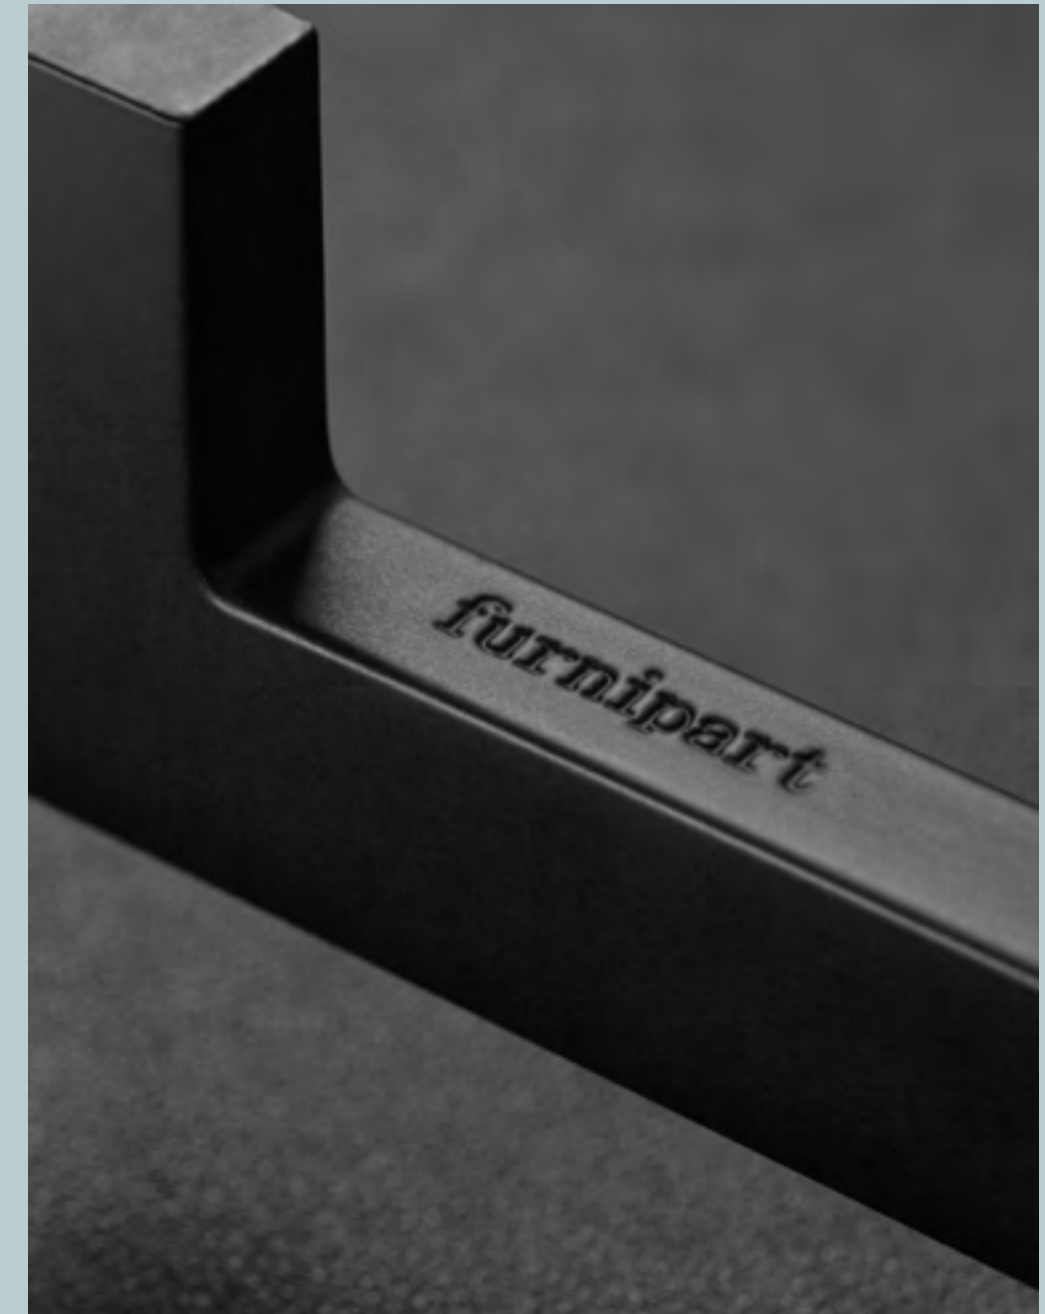

Tests are carried out at our own laboratory in Denmark as well as during production to ensure you receive our highest standard every time.

FSC™

A majority of furnipart's wooden handles are FSC certified. This means these handles are made with wood from well-managed forests. FSC, which stands for 'Forest Stewardship Council™', is an international non-profit organisation dedicated to promoting responsible forestry.

FSC certifies forests all over the world to ensure they meet the highest environmental and social standards. When you buy our FSC certified products, you can be confident they won't harm the world's forests.

For more info on what products carry the FSC certification please contact us.

HOW WE DO IT?

- We work closely with renowned designers to get each handle and knob just right
- We carry out surface tests with the most common chemicals that are used in kitchens. Citric acid, alcohol and acetone are just some of the chemicals that are applied to the handles to test their resistance.
- We carry out cross-cut tests – both with and without water – to test the handle's corrosion resistance.
- If a design doesn't meet our quality requirements, a new pilot production must be started. We do all of this to ensure that the handle meets the standards that an original handle from furnipart must meet.
- Our quality control team do random tests to inspect the surface on our handles to ensure that both colour and gloss is exactly right. By checking colour and gloss, our customers are ensured that our products are the same every time.
- When the results of the tests are satisfactory, they are documented using a reference test handle, which future products are measured against. This means that we carry out incoming goods inspection on every shipment of handles that arrive from our production facility to ensure that the handles that we receive meet the set standards for the given design.

ECONOMIC HANDLE DESIGN

In certain scenarios, sometimes cost is just as important as great design. So, we have a vast selection of cast aluminium handles within our range. Being cast aluminium makes these handles more cost effective, without compromising on the aesthetics or furnipart quality.

LONG HANDLES

Our collection of long handles accommodates the need of handles for tall cabinets and closet doors. Emphasizing the vertical lines of tall fronts, our long handles are a graphic design statement with clear functionality. These handles are not meant to be hidden though they can be discrete.

DID YOU ALSO KNOW?

- We send out over 100,000 handles to our kitchen and bathroom partners on a daily basis.
- Our warehouse facility is automated with nine AutoStore robots.
- A complete collection of all our images and technical drawings is accessible in our Media Library at furnipart.com
- All of our chrome and anodised aluminium profiles, as well as a considerable number of our Zamac products are Cradle to Cradle Certified® at bronze level.
- All products undergo a thorough quality inspection and testing – both at our production sites and in our laboratory in Denmark.
