

EASYSTICK

The new dimension in assembly

 **blum**®

A perfect assistant

EASYSTICK is the new ruler system by Blum. It facilitates the entire assembly process, giving you fast and simple machine set-up and perfect drilling patterns. Simply enter the dimensions of the workpiece and EASYSTICK will automatically calculate the fixing positions of fittings. Stops move automatically to the right position and you are shown the correct fixing positions step by step: Position panel, drill holes, done!

 **blum**

MINIPRESS with EASYSTICK

Blum's drilling and insertion machines ensure that you can drill holes into cabinets, doors and fronts quickly, precisely and with utmost ease. No matter whether you're using a MINIPRESS P, a MINIPRESS PRO or will soon buy yourself a MINIPRESS top. Fitted or retrofitted with EASYSTICK, these assembly devices become perfect assistants: they shorten set-up times, increase flexibility and guarantee high precision drilling.

Ready, steady, drill!

New! EASYSTICK incorporates a computer so for the first time you will be able to enter settings directly into the machine. Choose the right box system, select the motion technology and drawer side height you need and EASYSTICK will automatically calculate the right drilling positions.

Integrate data

Drilling data from the Cabinet Configurator/DYNAPLAN are transferred via a USB memory device. The barcode scanner allows you to retrieve and edit your work orders. Consequently, you can reduce mistakes and save time.

Ensure data is current

Updates can be downloaded and implemented via a USB memory device. So you can rest assured that EASYSTICK will always be up to date in terms of features and products.

i

Your advantages:

- Easy transfer of drilling data
- Fast and error-free assembly
- Simple updating process

i

Your advantages:

- Fast and easy installation
- Existing machines can be retrofitted
- Stops move automatically to the right position to ensure precise results

Position EASYSTICK ruler

EASYSTICK replaces the conventional ruler and revolutionises frontal and cabinet assembly – even with existing MINIPRESS PRO or MINIPRESS P machines.

Mount control system

The computer is screwed directly on to the machine using a special bracket – no matter whether you'd like to use a new MINIPRESS or retrofit an existing machine.

Drill holes into front or cabinet

EASYSTICK's illuminated markers indicate drilling positions. The ruler moves automatically. EASYSTICK gives you precise assembly and eliminates the need for subsequent adjustments.

EASYSTICK ruler

EASYSTICK ruler for MINIPRESS P / MINIPRESS PRO / MINIPRESS top

MZD.2000

Possible stop positions 6 – 953 mm

EASYSTICK computer

EASYSTICK computer for MINIPRESS P / MINIPRESS PRO / MINIPRESS top

MZD.5000

EASYSTICK extension ruler

EASYSTICK extension ruler for MINIPRESS P / MINIPRESS PRO / MINIPRESS top

MZD.2V00

Possible stop positions from 953 to 2681 mm

Extension ruler support

EASYSTICK extension ruler support for MINIPRESS P / MINIPRESS PRO / MINIPRESS top

MZV.2E00
