

TANDEMBOX antaro

Rectangular rail with a clear design
throughout the whole range

www.blum.com

 **blum**[®]

Minimalist design.

Proven technology.

TANDEMBOX antaro

The TANDEMBOX drawer system has been impressing furniture users and manufacturers with its proven technology for many years. The TANDEMBOX antaro programme line offers a wide range of design possibilities and minimalist design options. TANDEMBOX antaro is all about clean lines, whether it's open with a gallery or a closed drawer box with a side design element.

All components are colour-coordinated.
Minimalist design meets proven technology.
That is TANDEMBOX antaro.

Open, or with a design element. Consistent design

TANDEMBOX antaro starts with your choice of an open drawer, characterised by a rectangular gallery or a closed drawer with a side design element made from glass, metal or other material such as wood.

 **blum**

The design: three colours – one style

Minimalist style with a customised colour concept

The minimalist design of the TANDEMBOX antaro is based on clean lines and a simple colour scheme. All plastic components are coordinated to match the respective drawer side colour.

The colour programme includes three steel variants: silk white, white aluminium and terra black.

You have the choice.

And all options are available

With TANDEMBOX antaro, you can realise all of your design aspirations. From inner drawers, high fronted pull-outs to open or closed drawers. Even special applications such as the SPACE TOWER larder unit, the Blum sink pull-out or the SPACE CORNER corner solution are possible.

The programme – One system for all applications

 **blum**

The programme – Living room re-invented

blum

TANDEMBOX antaro offers a complete programme for pull-outs and drawers. Whether in the kitchen, bathroom or living area – all applications are possible with TANDEMBOX antaro.

Nominal lengths	270–650 mm
Cabinet widths	275–1200 mm
Drawer side heights	N (68.5 mm) M (83.6 mm) K (115.6 mm)

Design elements – Use to attain a unique style

By using design elements you will be able to fully enclose the drawer & simultaneously present a style statement. The elements you add can reflect your design aspirations. You can choose from Blum design elements (glass or metal). There are of course, many other possibilities (eg wood) you could use to express your ideas.

Glass design elements

Clear glass

Frosted glass

Metal design elements in three drawer side colours

Terra black

RAL 9006 grey (white aluminium)

Silk white

Your own ideas, e.g. using wood can easily be put into practice

The programme – Inner dividing system

blum

Practical organisation

The ORGA-LINE inner dividing system is not only practical, but also matches the shape and colour scheme of TANDEMBOX antaro. Storage items are perfectly organised using flexible longside and cross dividers. Stainless steel drip trays in the drawers provide high-quality organisation. Very practical: The containers are easy to remove and are dishwasher safe.

See the ORGA-LINE brochure for more information about this practical organisational tool.

Gallery and front are connected
via INSERTA technology

Assembly – Simple and tool-free

blum

Back gallery rails clip on easily.

Front tilt adjustment

Design element assembly is very easy. Simply slide in and connect to the back locking piece.

It is important to us that assembly is as quick and easy as possible, e.g. using the proven INSERTA technology – completely tool-free.

The TANDEMBOX program line is based on the established cabinet profile. This is a real advantage especially when you are assembling different programme lines. The drilling and cutting dimensions remain the same and familiar assembly devices support efficient assembly.

DYNAMIC SPACE – Ideas from Blum for practical kitchens

The three important features of a practical kitchen include good workflows, enough storage space and high ease of use – at Blum, this means: workflow, space and motion. With DYNAMIC SPACE, we offer helpful ideas, suggestions and solutions for making today's kitchen even more practical.

blum®

For more information about practical kitchens

<http://www.blum.com/ideas>

 **DYNAMIC SPACE®**

Ideas from Blum for practical kitchens

Workflow – Convenience

Thanks to full extension drawers & pull-outs, even those items in the farthest corner are visible and easy to reach. The right ORGA-LINE inner dividing system provides additional organisation and overview. In this way, TANDEMBOX antaro supports simple workflows in the kitchen.

Space – Optimisation

TANDEMBOX antaro can also be used as an enclosed drawer with glass or metal design elements. Products are easier to stack, thus creating up to 55% more storage space. You can also achieve special solutions such as the Blum sink pull-out with TANDEMBOX antaro, gaining additional storage space from previously unused areas.

Motion – Quality

The BLUMOTION function is integrated into TANDEMBOX cabinet profiles. Thus pull-outs always close silently and effortlessly regardless of how much force is used for closing. TANDEMBOX antaro can also be equipped with the SERVO-DRIVE electrical opening support system. A light touch on the front is enough and pull-outs open as if by themselves.

Easy opening

Lower opening forces and an even smoother transition to the feather-light glide improve performance from the moment you open the pull-out.

Outstanding quality

The improved drawer side combined with a new front fixing bracket has noticeably increased the stability of the product.

Optimised feather-light glide

Components in the drawer side and cabinet profile have been further developed to optimise the feather-light glide of TANDEMBOX and the smooth running action.

Technological developments

Over the course of the development of TIP-ON BLUMOTION for TANDEMBOX, some of the main functions of the existing system were also optimised. These tangible improvements to the technology mean even greater quality of motion.

TANDEMBOX cabinet profile

All TANDEMBOX lines are based on the tried and tested TANDEMBOX cabinet profile. The feather-light gliding motion has been impressing users for many years. Key to this success are the low-friction cylindrical rollers that guarantee top quality of motion for load bearing classes of 30 kg and 65 kg, for the life of the furniture. Numerous motion and load bearing tests are carried out to ensure this quality standard is maintained.

 blum®

**Fascinating action when
opening and closing**

blum

BLUMOTION

With BLUMOTION, pull-outs close silently and effortlessly. It doesn't matter how much force is used to close drawers and pull-outs or how heavily laden they are.

SERVO-DRIVE

A light touch on a handle-less front or a light pull of the handle – that's all it takes to open drawers and pull-outs with the SERVO-DRIVE electrical motion support system: And you always have integrated BLUMOTION.

TIP-ON BLUMOTION

TIP-ON BLUMOTION combines the advantages of the TIP-ON mechanical opening support system with tried and tested BLUMOTION dampening. Simply, push the drawer shut and then BLUMOTION cuts in for a silent and effortless closing.

The company Blum

Founded over 60 years ago by Julius Blum, Blum is a family-owned company that operates on an international scale. Its strategic business segments include lift, hinge and pull-out systems. All our product developments focus on perfecting motion.

www.blum.com

 **blum**

Blum in Austria and around the world

The company has seven plants in Vorarlberg, Austria, additional production sites in Poland, the USA and Brazil and 29 subsidiaries/representative offices. Blum supplies more than 120 markets. The Blum Group employs 7.300 people in total, 5.500 of whom work in Vorarlberg.

Global customer benefits

“Whether manufacturer, distributor, fitter or kitchen user – everybody should personally enjoy the benefits of Blum products” – that is Blum’s philosophy on global customer benefits.

Innovations

To support customers with innovative fittings solutions and secure long-term success for the company, we need to consistently invest in research and development, in plants and facilities and in employee training. With more than 2.600 patents worldwide, Blum is one of Austria’s most innovative companies.

Quality

Blum’s comprehensive concept of quality does not only apply to products. Services and collaboration with customers and partners should also meet the same quality requirements.

Environment

At Blum, we believe that responsible ecological behaviour has long-term economic benefits. The longevity of products is just one of many important aspects. Other important measures include the use of environmentally-friendly processes, the intelligent use of materials and prudent energy management.

DYNAMIC SPACE

Good workflows, optimum use of storage space and top quality motion are important features of a practical kitchen. Blum’s ideas for practical kitchens are designed to bring function, convenience and ergonomics to furniture interiors.
